#### Existing Chemicals Program Review Website Questionnaire Response

Organisation:

Question 1: To safeguard chemical users, the general public and the environment

Question 2: I believe the proposed new model would greatly enhance NICNAS's effectiveness and ability to protect users, the general population and the environment

Question 3: I would like to see NICNAS provide people in regional areas with a regular opportunity to present personal concerns in relation to any industrial chemicals.

Question 4: I support all proposals

Question 5:

Question 6: It is vital that the deficiencies in the existing chemical programme do not lead to more responsibility being placed on industry to undertake testing and risk assessments. The assessment of hazard/risk associated with chemicals must always remain in the hands of an independent and transparent body.
