

## Voluntary Call for Information on Chemicals (Acids & Gases) – downstream users of chemicals of potential security concern

The National Industrial Chemicals Notification and Assessment Scheme (NICNAS) published a voluntary call for information on certain chemicals which are of potential security concern in the Chemical Gazette of July 2010 which can be accessed at:

[http://www.nicnas.gov.au/Publications/Chemical\\_Gazette/Chemical\\_Gazette\\_July\\_2010.asp](http://www.nicnas.gov.au/Publications/Chemical_Gazette/Chemical_Gazette_July_2010.asp)

This stage of the call for information is directed at resellers, formulators and end users of the 5 bulk chemicals listed below.

To assist with the recording of relevant information on these chemicals, NICNAS has developed survey templates which can be downloaded by clicking on the chemical name in the Table

Chemical Name	CAS No.	Common Name
<a href="#">Ammonia (anhydrous)</a>	7664-41-7	Ammonia gas
<a href="#">Chlorine</a>	7782-50-5	Chlorine gas
<a href="#">Hydrochloric acid</a>	7647-01-0	Muriatic acid
<a href="#">Hydrogen chloride (anhydrous)</a>	7647-01-0	Hydrochloric acid, gas
<a href="#">Sulfuric acid</a>	7664-93-9	Oil of vitriol

Please send the requested information by **6 December 2010** to:

Maureen Hardy  
Science Strategy & International Programs  
NICNAS  
GPO Box 58  
Sydney NSW 2001

email: [maureen.hardy@nicnas.gov.au](mailto:maureen.hardy@nicnas.gov.au).

NICNAS is collating information on the 5 chemicals on behalf of the Australian Government Attorney General's Department (AGD). The information will primarily be considered to inform risk assessments on these chemicals of potential security concern.

For further information, please contact Mr Phillip Sharp by phone: (02) 8577 8820, fax: (02) 8577 8888 or email: [phillip.sharp@nicnas.gov.au](mailto:phillip.sharp@nicnas.gov.au).
